

PORTFOLIO

Portfolio 2009

Welcome to the illuminated, innovative and novel world of Light Architecture, produced by Danpalon with the assistance of a worldwide global network of subsidiaries and distributors.

“First there was light, the source of life...”

Our passion and main objective is to act as light providers; to give free rein to the imagination and creative spirit of artists, designers and architects.

Our systems are regularly enriched with new layouts, colors and forms to stimulate endless genuineness.

Danpalon offers more than just an attractive visual appearance- we also seek to build connections; linkage between the old and the new, the natural and the artificial, the traditional and the innovative and to facilitate exemplary architectural solutions through technological innovation and cutting-edge technical assistance.

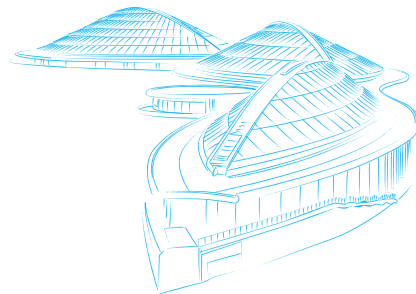

Danpalon's worldwide subsidiaries and distributors working in lighting solutions and project implementation based on in-depth knowledge and experience accrued over the years. Danpalon's distributors develop specialised applications, tailored to the creative needs of the market.

Throughout the world, Danpalon's distributors provide professional, technical service in order to carry out the architects wildest visions - dreams to a reality.

HQE- High Environmental Quality

The Danpalon Microcell system provides the best light diffusion, eliminating glare from direct sunlight and creating a UV radiation barrier.

Other advantages of Danpalon's Microcell system include; saving energy, reducing waste of natural resources, It is 100% recyclable, reduces the need for air conditioning and requires less framework because it is a light weight system.

Bus Terminal
Ecuador

A nighttime photograph of a modern building entrance. A large, curved glass canopy with a metallic frame spans the entrance. Below the canopy, a road with a white center line and yellow side lines leads towards a building. Long, bright orange and red light trails from passing vehicles are visible on the road. The building has a brick facade on the left and a glass-walled interior on the right. A yellow sign with a black 'A' symbol is visible on the left side of the road. The overall scene is illuminated by streetlights and the building's interior lights.
