

When Danpalon lights up the French Pavilion of Shanghai.

The opening of Shanghai expo 2010 took place on the 1st May.

To represent France, the project of the French architect Jacques Ferrier was selected. His architectural concept was to combined man-made and natural environment through the design of an innovative structure of the envelope and a French style garden.

The impressive grid and Danpalon façade that surrounds the pavilion gives the impression that the building is levitating over the reflective pool.

The Danpalon® skin blends harmoniously with the grid structure by day and expresses a remarkable light effect at night!

The pavilion illuminates thanks to it façade in Danpalon® known for its ability to play with the light and create amazing contrasts as soon as the sun disappears....

Architect : Jacques Ferrier
